

Strapping station

Placing the take-apart process reel on the reel tilter with a jib crane and the exact adjusted lifting device

The reel turns 90° by means of the heavy mechanical tilting unit.

Bolts are removed using air wrench

Withdrawing the collapsed barrel with permanent fixed flange (with jib crane and the exact adjusted lifting device)

Features:

Heavy mechanical reel tilter Type EWV

- For turning of reels and coils through 90°
- Can be supplied for reels from 800 – 1400mm, load capacity up to 6 tons.
- Special design according to customer's request
- Can be supplied optionally with rolls on the tilter, so that the collapsible reel can be turned to strap the coil. Additionally the rolls can be motorized, in order to facilitate the turning of the collapsible reel.

Collapsible reels

Type ATT / ATTS / ATTH / BATTs

- Built for high winding speeds
- Reproducible tolerances after assembly and disassembly.
- Special sizes on request.

Coil Lifter

Type CIG –

for lifting of wire coils with cylindrical barrel

Type CIGKON –

for lifting of wire coils with conical barrel

- A rugged toggle joint system ensures that the coil remains fixed to the spreading segments by its proper weight.
- Built in exact accordance with the coil dimension
- Can be built in all special sizes
